

Starmide A1111G

Hot melt polyamide adhesive in granules form. Developed for folding up and beading work with natural and synthetic materials with extraordinary bond strength.

Starmide A1111G: is supplied in regular shape granules, it has high temperature stability in the melting pot and offer good flexibility with improve bond strength. This product has no toxic ingredients.

Technical characteristics:

Softening point 96 –105 °C

Specific gravity 0.98 g/cm³

Brookfield viscosity @ 160°C 2800 - 3800 mPa.s

Gardner Colour < 8

Working temperature 130 - 160 °C

Storage:

In usual storage condition the material is stable for 6 months minimum.
