

Fortemide / 1560 G

High quality hot melt superpolyamide adhesive recommended in the filter industry , for the production of air and oil filter, requiring good stability and long life.

Fortemide: gives excellent adhesion to different types of materials like cardboard, non woven filtration paper , P.U. flange etc. This product contains no toxic ingredients.

Technical characteristics:

Melting Point R&B 155 –167 °C

Softening point Cup+Ball 170 7°C

Specific gravity 0,98 g/cm³

Brookfield viscosity @ 200°C 3200 – 4200 mPa.s

Elongation at break 500%

Storage:

In usual storage condition the material is stable for 12 months minimum.
